

ROBOCUP™

BALL RETURN ROBOT

BEST NEW PRODUCT 2009 PGA MERCHANDISE SHOW

SAVE TIME. PRACTICE SMART.

RoboCup is an automatic ball return robot that fits in any practice or full-depth cup. It is the only device designed to work on any practice green! It doubles or triples the number of practice putts you can take because it saves you so much time retrieving your shots, as well as, the wear and tear from bending your back. When your practice putts drop in the hole, RoboCup™ shoots them back to you at distances of up to 14 feet. Use RoboCup Caddy Cord™ around the hole and even missed putts get fired back to you. The Pros know it – RoboCup is such an effective tool, they're using it on Tour practice greens.

RoboCup™ was award "Best New Product" by PGA Merchandisers of the Year at the 2009 PGA Merchandise Show in Orlando, FL.

Key Features

- Returns the ball 14 feet or more, depending on green speed
- Operates on 4 AA batteries, lasting over 12,000 putt returns
